**Subject:** Nordic and Baltic Farmers' letter on climate change adaptation

Dear Commissioner Andriukaitis,

Please find attached joint letter from the Nordic and Baltic Farmers' organizations on the climate change adaptation with the title **'Technology and research are crucial for farmers to produce food, to adapt to changing climate and to provide climate change mitigation results'**.

Looking forward to your support in these challenges farmers are facing.  
Wishing you and your team a great summer break,  
Best regards,
