EU grains, oilseeds and feed value chain partners welcome European Commission Communication on Deforestation

EU grain and oilseed trade, crushing and feed industry sectors represented by COCERAL, FEDIOL and FEFAC welcome the European Commission Communication on *Stepping up EU Action to Protect and Restore the World's Forests*, adopted on 23 July 2019.

We acknowledge and support the European Commission's ambition to raise public attention on deforestation and related climate change commitments at EU and international level, which are also reflected in the recent EU-MERCOSUR trade agreement chapter on trade & sustainable development.

We consider that setting up a permanent and effective multilateral institutional dialogue with exporting countries is the most effective way to address sustainable forest management and assist value chain partners to build responsible supply chains for agricultural products.

We therefore welcome the Communication provision of a reliable and predictable institutional framework, which links current private-public sector initiatives and sets up a structure through which public and private actors can improve the coordination and efficiency of their respective efforts to halt deforestation.

Conscious of their role and responsibility, the trade, crushing and feed sectors have been extensively engaged in initiatives and commitments aiming at removing products at risk of causing deforestation from their supply chains. Over the recent years, companies have made sourcing commitments in an effort to contribute to mainstream market transformation for responsibly produced oilseeds and feed grain products, both from imported and home-grown origin.

Our three associations already coordinate actions taken by our own members in origin and destination markets, in order to serve EU demand for responsibly produced (including deforestation-free) products. We are also engaged in partnerships with producer countries, so as to facilitate the mainstream transformation of the market into one supplied by responsibly produced grains and oilseeds used in food, feed and biofuel production.

COCERAL is the **European association of trade in cereals, rice, feedstuffs oilseeds, olive oil, oils and fats and agrosupply**. It represents the interest of the European collectors, traders, importers, exporters and port silo storekeepers of the above mentioned agricultural products. For further information, please contact Iliana Axiotiades Secretary General Tel. +32.2.502.08.08, email: secretariat@coceral.com

FEDIOL represents the interests of the **European vegetable oil and protein meal industry**. With over 180 facilities in Europe, the sector provides over 20.000 direct employments. Our members process approximately 55 million tonnes of basic products a year for the food and non-food markets. Oilseed crushing produces vegetable oils and protein meals as co-products. While vegetable oils are used for food and technical uses (pharmaceuticals, paints, detergents, biodiesel, etc.), protein meals are used to meet the increasing global demand for meat and protein. For further information, please contact Nathalie Lecocq, FEDIOL Director General, at Tel: +32 2 771 53 30

FEFAC, the **European Compound Feed Manufacturers' Federation**, represents 23 national Associations in 23 EU Member States as well as Associations in Switzerland, Turkey, Serbia, Russia and Norway with observer/associate member status. The European compound feed industry employs over 100,000 persons on app. 3,500 production sites often in rural areas, which offer few employment opportunities. For more information see our web site (www.fefac.eu) or please contact Alexander Döring, Secretary General Tel. +32-2-285.00.50, Fax +32-2-230.57.22, e-mail: fefac@fefac.eu
