Attachments: Frontiers Induced Genetic Variation in Crop Plants by Random and Targete....pdf

Dear colleagues,

I hope you and your family are all well.

After further communication with Denmark, they requested to consider the attached scientific opinion from scientists of Aarhus University as one of the Danish competent authorities input for the EFSA overview on the RA of NGTs.

Best regards,

Subject: DK contribution - mandate on the risk assessment of new genomic techniques

Dear colleagues,

As agreed for EFSA overview on the risk assessment of new genomic techniques, you will find attached the Danish scientific opinion that we have received.
For the purpose of the mandate we invite you to only take into consideration definition and risk assessment related issues.

Best regards,
