Subject: draft explanation GE detection
Attachments: Draft Note on GE detection_17 Sept 2018_for ENGL.docx
Importance: High

Dear Both,

As indicated earlier we are distributing now the attached version of our draft note to the ENGL members in preparation of the upcoming annual meeting.

The explanatory note is intended to outline for non-experts current and envisaged possibilities and limitations of detecting GMFF obtained from gene editing.

Obviously, we would welcome also comments or suggestions from you which would be included into the final revision process. Therefore, an MS Word version (easier for track changes) is attached for you.

After the ENGL meeting the JRC EURL GMFF will review the draft and publish the final version on the publicly accessible webpage of the EURL.

With best regards.
