**Subject:** More information on consequences from the ECJ ruling  
**Attachments:** Information from Swedish businesses and universities.pdf

Dear Sir/Madame

In order to collect information on the consequences of the EU Court of Justice (ECJ) ruling, the Swedish Board of Agriculture (SBA) have contacted a number of organisations, companies and research institutes with an interest in plant breeding, plant research and agriculture. We requested information regarding if the ruling will affect them and in that case how and to what extent. We have summarised the information we received in the document you find annexed.

The document also contains a cost estimate for necessary investments and analyses performed by the Swedish National Reference Laboratory (NRL) for GMOs, which is a part of the Swedish National Food Agency.

Kind regards, [REDACTED]

[REDACTED]  
The Swedish Board of Agriculture
