2. The writer is forwarding this material to you with the thought that you may wish to show it to [redacted] [redacted] who have supported APTI activities for a long time. It is interesting to note that the material is tasteless, odorless and capable of easily being concealed in any common liquid, hot or cold. It is, as you know, extremely powerful. One hundred grams or 100/1,000,000 of a gram would be a heavy dose and this amount in a crystalline state would easily rest on the head of a pin. Sufficient to say that the amount contained in the attached box would probably produce serious insanity for periods of eight to sixteen hours and possibly longer for all security officers in [redacted]. The writer, however, does not recommend it either for the Christmas party to be usually present at Christmas office parties.
