MEMORANDUM

26 March 1971

TO:

FROM:

SUBJECT: Status of Literature for Personnel Incapacitation Contract

We are returning to you under separate cover all documents (but one) which you sent to us on loan at the beginning of this contract; many of these we have xeroxed for our further use in this project.

We received from you duplicates of three documents, listed below, of which we are keeping one copy each and returning one copy to you:

1. "Electric Shock as It Pertains to the Electric Fence," Underwriters' Laboratories, Inc., Bulletin of Research, No. 14, December 1939, 4th printing, April 1955.
2. Welch, A. J., et al. Analytical Methods for Analyzing Signals in Optical Impairment Experiments. Antennas and Propagation Division, Electrical Engineering Research Laboratory, the University of Texas at Austin, 15 October 1969, Report No. P-39.
3. Excerpts from "_____ Study-IDA," beginning with "Table I. Categories of Criteria for Nonlethal Weapons," p. 189, and ending with reference 70, p. 287. Title and other details unknown.

We would very much like to review a complete copy of the _____ Study" (no. 3 above), if it is available.

A list is attached of 14 documents which we would like you to obtain for us, if possible; because they are all classified or of limited distribution, they cannot be ordered through our local channels. Number 11 on the list is the same as one of the publications which you sent us; in the meantime, we would like to keep your copy for current use.

Our literature search so far has included the _____ and the _____ libraries, and has yielded approximately 70 documents, articles and books related to personnel incapacitation. Analysis of this new material is just underway.
