2. The writer is forwarding this material to you with the thought that you may wish to show it to [redacted] who have supported AMPLI-MORSE activities for a long time. It is interesting to note that the material is tasteless, odorless and capable of easily being concealed in any common liquid, hot or cold. It is, as you know, extremely powerful. One hundred grains or 100/1,000,000 of a grain would be a heavy dose and this amount in a crystalline state would easily rest on the head of a pin. Sufficient to say that the amount contained in the attached box would probably produce serious insanity for periods of eight to eighteen hours and possibly longer for all Security Officers in [redacted]. The writer, however, does not recall and testify in the Christmas party he usually presents at Christmas office parties.
